

1    **Abstract of Disclosure**

2    A cigarette lighter includes a reservoir for storing fuel and a head formed  
3    on the reservoir. Moreover, the cigarette lighter includes a valve for  
4    releasing the fuel from the reservoir, a nozzle put in the head for spraying  
5    the fuel from the valve, an ignition device for igniting the fuel sprayed  
6    from the nozzle, a cover for covering the head and an alarm for providing  
7    only one round of a message every time the cover is lifted.
